**iClicker**
Active learning simplified

Follow the steps below to get started:

1. Download the Mac software directly from our website using the "Mac" icon/link and follow the directions shown when you view the .dmg contents (below).

   **NOTE:** do not follow the "custom version" link on the downloads page.

iClicker Classic
Instructor

Directions:
1. Create a new folder called iClicker Classic (or similar).
2. Copy and paste the iclicker.app file (on the left) into that folder.

The first time you run iClicker from this new folder, it will automatically create all the supporting files and folders and iClicker will function as normal.

iclicker.app

2. Launch the software - you will see folders being created: Classes, Resources and etc.

Name
▶ 📁 Classes
   📄 errorlog.txt
   ▷ iclicker.app
   📄 QuickStartGuide.pdf
▶ 📁 Resources
   📄 UserGuide.pdf

3. Copy the LMS_Wizard file from the folder in which you found this "Read Me First" document.

4. Paste the LMS_Wizard file inside the **Resources** folder

5. Please check for updates in the software periodically, since new versions are released every semester

NOTE: If you need more additional assistance please refer to this Support article.
